

***NEW* FastWeld Extended Cure Epoxy Putty Stick**

Introducing FastWeld Extended Cure epoxy putty stick for repairs that require more working time. FastWeld Extended Cure, with a 30–38-minute cure time, is your answer.

FastWeld Extended Cure lets you fine-tune your repairs with precision, ensuring a flawless finish.

If you are sealing leaks, filling cracks, or bonding materials like metal, wood, or plastic, FastWeld Extended Cure delivers steel-like strength once cured.

Your repair is waterproof, durable, and ready to withstand the elements.

Easy to use: just knead, apply, perfect your repairs.
